

Instructions for off-line entry for HSC Feb/March-2017 applications.

1. A blank template form to collect student information is available in download section.
2. A patch (HSC update patch v 1.0.0.5) for application entry in off-line mode for HSC march 2017 is available in download Section on main page of board website , for those Colleges who have already software installed on their machine.
(If you are unable to view the patch in download section , clear the Browser history using Ctrl + shift + del) .
3. Those colleges who don't have offline setup CD , can download full software from download section after college login.
4. Before starting HSC_APP , the wamp server must be in green colour and after click on It shows "Put offline" at bottom.
- 5 All users are requested to download update patch and run on the machine Where off-line setup is done. After this setup login & run "Start New Session " option on dash board to start new session. This option will back up all data for previous Session , Store it in C: on local machine & start a fresh session for Feb/March 2017 exam . **Make sure that new session Feb-2017 is displayed on main page of off- line entry.**
- 6 **A zip file ends with _7.zip is created** for 2017 applications. Create a sample zip file and check whether it generates properly or not.
- 7 Create batch files of 50 to 60 application forms for efficiently Upload of data on server.
- 8 Dates for upload & online form filling will be declared by board separately.
